**EPATest.com**
by Mainstream Engineering

Technicians and Proctors,

Mainstream Engineering will no longer collect or process Social Security numbers for any certification testing. Technicians will be required to have their Mainstream issued **Tech ID** when taking any of our 608 proctored exams. The **Tech ID** can be found within the "**My Info**" tab or in the top right corner after registering for an account or logging in on EPATest.com.

If you are at a supply house taking our paper scantron exam, please write and bubble in your **Tech ID** to the "Social Security Number" field. If you are taking a computer-based exam at a supply house or with ProctorU, you will enter your **Tech ID** along with last name prior to beginning the exam. Please see the picture below for how to bubble in your **Tech ID** on the scantron test**:**

Please log in to EPATest.com **BEFORE** your exam day. This ensures you have your **Tech ID** ready and prevents any delay in the grading process. See our full FAQ for any additional questions you may have.
